DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-6 and 9-14, drawn to a shopping application, class 705, subclass 27.
- II. Claims 7, 8, and 15-17, drawn to hypermedia, class 715, subclass 501.1.

Inventions I and II are related as combination and subcombination.

Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because the invention is drawn to a shopping application that hot links a customer from a shopping site to a merchant site and returns the customer to the original shopping site. The subcombination has separate utility such as document linking.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper. Because these inventions are distinct for the reasons given above and the search required for

Art Unit: 3625

Group I is not required for Group II, restriction for examination purposes as indicated is proper.

During a telephone conversation with Mr. Bradford Blaise, Reg. #47,429, a provisional election was made without traverse to prosecute the invention of claims 1-6 and 9-14. Affirmation of this election must be made by applicant in replying to this Office action. Claims 7, 8, and 15-17 are withdrawn from further consideration by the examiner, 37 CFR 1.142(b), as being drawn to a non-elected invention.

Drawings

1. Figures 1 and 2 should be designated by a legend such as --Prior Art-- because only that which is old is illustrated. See MPEP § 608.02(g). A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

Specification

2. The specification has not been checked to the extent necessary to determine the presence of all possible minor errors. Applicant's cooperation is requested in correcting any errors of which applicant may become aware in the specification.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. Claims 1-6 and 9-14 are rejected under 35 USC 102(e) as being anticipated by Arnold et al. (patent number 6,016,504).

Arnold et al. teach all the limitations of Claims 1-6 and 9-14. For example, Arnold et al. disclose a system and method for establishing and maintaining a virtual outlet relationship on the Internet between an entity that controls and manages a Web site constituting a virtual outlet and a merchant that controls and manages a different Web site (please see at least abstract; Fig. 1A (1A01, 1A09, 1A10, 1A11); col. 1, line 5 through col. 4, line 32). Arnold et al. further disclose:

- the use of computers executing programs, commands, logic, and routines (see at least col. 1, lines 47-58; col. 12, lines 1-12; col. 13, line 58 through col. 14, line 6),
- a first web page associated with an a shopping application (Fig. 1B (1B11); Fig. 25; col. 7, lines 30-41),

Art Unit: 3625

- a second web page associated with a merchant (Fig. 1B (1B20, 1B30); Fig. 26; col. 7, lines 41-50),
- the updated second web page with a hyperlink to the first web page (see at least Fig. 1B (1B40); col. 7, lines 50-54),
- a third object associated with a third web page included in the second web page that includes a confirm order button to complete a sale (see at least Fig. 27; col. 14, lines 41-55), and
- use of the return Web page after the sale is complete (see at least col. 7, line 55 through col. 8, line 6).
